

ABSTRACT NUMBER	Title	First Author
1	Developing a Team Objective Structured Clinical Examination (TOSCE) to assess airway management competences of anaesthesia residents	Rewers
17	A victim database for computer-based disaster medicine simulation and training	DeBacker
38	Do medical trainees find simulation training more beneficial in the clinical setting than when placed in the simulation laboratory?	Mitra
47	Bristol medical emergencies simulation course	Johnston
58	Pediatric H1N1 decision matrix	Wilks
7	Simulation of virtual arteries based on the Sweep surfaces	Baier
54	Reducing errors in health care: cost-effectiveness of multidisciplinary team training in obstetric emergencies: the TOSTI trial	van de Ven
52	SIMULATION-BASED TRAINING IN CRISIS RESOURCE MANAGEMENT FOR ANAESTHESIOLOGY RESIDENTS	Ulufer2
59	Including the effects of ischemia in simulations of neural networks	Zandt
33	Non-invasive ventilation in general wards: improving safety by a simulation course	Cabrini

ABSTRACT NUMBER	Title	First Author
14	Paediatric Resuscitation Instructor Training: Bridge to the future: from basic to highly advanced simulation	Conrad/ Wermter
65	Validation of computer-generated cardiocograms with early decelerations	Van der Hout
66	The development of an evidence-based, basic course in minimally invasive skills	Burie
23	A new flat screen simulation based on mathematical models of multiple physiological systems used for medical education	Giannessi
53	RETROSPECTIVE ANALYSES OF OUR TRAINING PROGRAMME FOR ANAESTHESIOLOGY RESIDENTS AT OUR SIMULATION CENTER	Ulufer
61	Does size matter? The experience of a small simulation center	Soobrah
46	Standard Paediatric Resuscitation Courses meet realistic life-like environment for Simulation	Sasse Mitzlaff
4	Mapping healthcare simulation to Chickering and Gamson's good education practice principles	Alinier

ABSTRACT NUMBER	Title	First Author
37	Training in resuscitation. A comprehensive training programme for hospital staff at the Copenhagen County Hospitals	Kammer Jensen
44	Setting up a skillscenter: similarities and differences between the Netherlands and Tanzania	Roodbol
28	Novice Anaesthetic Trainee Simulation Program designed and implemented by a regional simulation network	Hellewell
43	Development of an 'Expert' Physiological Model as an Assessment Tool in High Fidelity Simulation Utilising the Advanced Physiological Modelling of the METI HPS (Medical Education Technologies Inc. Human Patient Simulator)	Juneja
31	High-Fidelity Simulation-based training module for Anaesthesia Core trainee years 1 and 2 on Acute Post-operative Pain management	Kalbag
3	Clinical examination in a simulation center	Alenius-Karlsson
55	New Simulation strategies applied to virtual worlds	Vazquez new sim
70	Standardized patient handover in the emergency department	Søyland
72	The role of e-learning in simulation training	Steenbeeke
