

Date	Theme	Session chaired by	Abstract No	Title	Presenter
16.06.2010	Nurses	Klein-Ikkink/	5	Integration of simulation based training in the formal education of anaesthesia nurses	Helso
			40	Nursing and Health Care Students' Experiences of Training in "ENVI": a Virtual and Simulation-based Learning Environment	Yliniemi
			48	High-fidelity simulation as a tool for improving registered nurses' competence in supervising nursing students - Evaluation of a pilot training program	Eikeland Husebo
			30	Effectiveness of simulation as part of postgraduate nursing students critical care modules on knowledge retention in the National University of Singapore	Ignacio
	ICU and emergency care	Schroeder / Delwig	41	Multidisciplinary simulation training-MUST	de Maaijer
			35	MEERKATS: a multiprofessional training programme in acute care using 'nested' one day courses and simulation	McAnulty
			56	Development of an OSCE for Intensive Care Medicine	Vazquez
			47	Bristol medical emergencies simulation course	Johnston
	Education/Teaching	Burie/	11	Improvements aimed at achieving standards of excellence in the teaching activity of the Medical Simulation Centre of Granada	Calidad / Vazquez
			64	Facilitators' and Students' Views of Teaching and Learning in a Simulation-based Learning Environment	Keskitalo
	in program Enschede		10	Shared mental models as predictors for coordination and team-performance in anesthesia: A simulator study	Burtscher
			19	Impact of crisis resource management training on communication, teamwork and leadership, re-evaluation, mobilization of resources, and anticipation in simulated cardiopulmonary resuscitation scenarios	Fernandez Castela
			34	development of expertise using expert levels and learning curves for multiple performance variables	Luursema
			kick-off	The development of an evidence-based, basic course in minimally invasive skills	Burie

Date	Theme	Session chaired by	Abstract No	Title	Presenter
	Curriculum design	<i>Burlacu / Borg</i>	16	Development of integrated simulation anaesthesia training in Ireland	Burlacu
			26	Educational concept of a large hospital chain in Germany	Heinrichs
			29	A 'simulation-enhanced' curriculum for the teaching of physiology to undergraduate medical and biomedical sciences students	Helyer
			50	Developing a national consensus for simulation based education in the NHS healthcare system	Stewart
			45	Developing a strategy for simulation based education and training across the East Midlands, UK	Longfellow
	Research in program Enschede	<i>Group Enschede</i>	32	Development & Psychometric Testing of a Simulation-based Evaluation Tool to Evaluate Performance for Assessing and Managing Clinical Deterioration	Liaw Sok Ying
			73	Validity of simulation as an assessment tool - A critical appraisal of literature.	Khan
			71	Using a cognitive architecture to design the education of flexible and robust skills	Crossen, Grapengeter
	Expert panel TTT		57	A comparison of European TTT activities	Vollmer

Date	Theme	Session chaired by	Abstract No	Title	Presenter
17.06.2010	Technical		6	Adding Lung and Electrical Activity of the Diaphragm Simulator to Enhance Realism in Mechanical Ventilation	Astolfi
			12	A MULTILINGUAL VIRTUAL SIMULATED PATIENT TO IMPROVE HEALTH PROFESSIONALS' TRAINING	Castro
			49	Could the high-fidelity WOW factor fade after a while?	Soobrah
			39	Why models can be so exciting	Moenk
			15	Demonstrating real-time pressure changes during the cardiac cycle 'from the inside' using the high-fidelity Human Patient Simulator	Corry Butlin
	Safety		8	Medical simulation and safety procedures learning: an example in surgery, the "World Health Organization/French Haute Autorité de Santé" check list.	Benzaken
			24+25	Multi-professional simulation based training: a patient safety study	Glesa
				Does multi-professional simulation-based patient safety team training session change the self reported behaviour of the individuals and the teams involved in the training program?	Glesa
			51	In situ simulation sessions are major opportunities to identify and resolve latent system errors	Truchot-Cardot
			69	Patient Safety: Lessons learned from aviation accidents	Bjørshol
	Outcome		36	COMPARISON OF EMERGENCY MEDICINE AND ANESTHESIOLOGY TRAINEES' PERFORMANCES ON CARDIAC ARREST SCENARIOS WITH SIMULATOR	Aksoy
			68	Simulation based intervention reduces physiological stress, psychological stress and burnout among nurses	Tuval, Berkenstad
			67	Assessment of educational methods: full scale simulation training versus paper case based seminary rounds	Hauschild
			62	Management of Simulated Technical Anesthesia Machine Malfunction by Israeli Residents	Berkenstadt

Date	Theme	Session chaired by	Abstract No	Title	Presenter
	Bring your Center to Market	<i>De Vries, Ten Cate</i>		J. de Vries <i>Marketing of services</i>	
				A. Ziv <i>The strategy of MSR, the Israel perspective</i>	
				H. ten Cate Hoedemaker <i>The challenge of implementing simulation in an apprenticeship model</i>	
				W. Heinrichs <i>From academic to profit orientation</i>	
18.06.2010	Paediatric	<i>Eppich /</i>	18	Development and implementation of a paediatric simulation instructor course: a report from the PaedSim Collaborative Group	Eppich
			27	Development and implementation of an in-house simulation-based paediatric team training program	Eppich, Heinzl
			63	INSITU PAEDIATRIC SIMULATION USING SIMBABY AND SIMNEWB	Shepherd
			13	Is high fidelity worth while in pediatric scenario training for medical students?	Escher
	Obstetrics in SIG Obstetrics	<i>Oei</i>	22	Importance of simulation in team training for critical events in Obstetrics First phase results of the Portuguese plan of continuing medical education	Maio Matos
